Features & benefits

- **Two styles for how cards sit in carrier sheet**
 - **Integrated** – the card is on a carrier sheet with a plastic patch incorporated into the sheet behind it. The card can be peeled off, while the patch remains.
 - **Die-Cut** – the carrier sheet is perforated or die-cut around the card. It is a “punch out” style: the user pushes the card through the sheet instead of lifting it off.
- **Five material options** - gives you flexibility on durability and cost
 - Paper with a laminate back (EZ-Card PromoCard)
 - Tri-blend of polyester/paper/polyester (EZ-Card EconoCard)
 - Waterproof polyester (EZ-Card Poly)
 - Waterproof polyester with repositionable adhesive (EZ-Card Repositionable)
 - Clear film with adhesive back (EZ-Card Window Decal)
- **Options for 1 Up, 2 Up and 2 wide sheets** - allows you to choose 1, 2 or 4 cards per sheet
- **Combo sheets available** - 2 different card materials can be combined on a 2 Up sheet
- **Compatible with laser printers and offset printers**

Help and support

With EZ-Cards, you can do it all yourself, we can print your piece from start to finish or we can meet in the middle. How? On a laser-compatible card, certain sections can pre-printed while other sections are left blank so you can print any variable data yourself. Simply reach out to one of our specialists today.
