**Relyco Shows Organizations How to Save Significant Time and Money  
with a MICR Laser Check Printing Solution**

*Learn about the benefits of in-house check and payroll printing in the newly published  
whitepaper: [The Value of MICR Check Technology](#)*

**Dover, N.H., June 22, 2010** – [Relyco](#), a leading provider of value-added business printing solutions, business equipment, and check printing software, today announced the availability of a new whitepaper: [The Value of MICR Check Technology](#). Download and read this whitepaper today to learn all about [MICR ANSI standards](#), the components of a MICR laser check printing solution, and how to quickly implement a solution to begin saving time and money.

Magnetic Ink Character Recognition (MICR) is the technological standard for the secure printing of checks and Image Replacement Documents (IRD) within the financial services industry. More than ever, organizations depend on MICR for the security needed to combat the threat of check fraud in the digital age.

“Organizations need to know that they have a cost-effective choice when it comes to printing and issuing checks,” said Bruce Steinberg, senior vice president of sales at Relyco. “With a MICR laser check printing solution, you can print your own secure checks on-demand that adhere to ANSI standards and meet the strict quality requirements and quality control processes of businesses, government agencies, and the financial industry.”

This whitepaper defines MICR, discusses its history, and reviews the components of a MICR laser check solution. Additionally, the whitepaper highlights the value of MICR technology and describes how Relyco helps corporations, government agencies, and financial institutions realize the benefits of MICR solutions.
